

IGNACIO SPREAFICO

Data & Product Analytics | Analytics Engineering | Machine Learning & Decision Science

Barcelona, Spain | Open to UK Relocation | +34 607 690 944 | nachospreadico06@gmail.com

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFILE

Data & Analytics professional with 5+ years of experience building decision systems, automated data workflows and analytical products that turn complex data into measurable business impact. Strong in SQL, Python, Power BI and dbt, with hands-on work across data modeling, experimentation, statistical analysis and applied machine learning. Combines technical execution with product and business thinking, backed by a Bachelor of Medicine and a scientific, hypothesis-driven approach to problem solving.

TECHNICAL SKILLS

Programming & Analytics: SQL, Python, Power BI, DAX, Power Query, Excel, VBA

Analytics Engineering: dbt Core, Data Modeling, ETL/ELT, Data Transformation, Data Quality & Testing, Git

Product & Decision Science: A/B Testing, Hypothesis Testing, KPI Design, Statistical Analysis, Forecasting

Machine Learning: scikit-learn, XGBoost, Logistic Regression, Random Forest, Feature Engineering, Model Evaluation

Python & Data: pandas, NumPy, matplotlib, seaborn, Streamlit

Databases & Tools: SQL Server, MySQL, SQLite, GitHub, Jupyter, VS Code

EXPERIENCE

COTY | Data Analyst - Forecasting | May 2024 - Present

Barcelona, Spain

- Owned end-to-end analytics for global seasonal campaigns spanning multi-million units and dozens of markets, translating complex demand signals into allocation, launch-readiness and risk-mitigation decisions.
- Designed and scaled a Quota vs Forecast decision system using Power BI, SQL and Python, enabling earlier interventions and contributing to double-digit reductions in Value at Risk.
- Built and productionized automated multi-source data pipelines, reducing manual effort by ~80% and accelerating executive decision cycles.
- Applied statistical analysis including trend decomposition, correlation analysis and anomaly detection to support scenario planning and decision-making under uncertainty.
- Established a structured forecast-challenge framework, stress-testing market assumptions against historical performance and in-season signals to improve forecast quality and downstream decisions.
- Partnered with Supply, Finance, Marketing and Commercial stakeholders to translate ambiguous business questions into structured analyses and actionable recommendations.

Tech: SQL, Python, Power BI, Excel, SAP S/4HANA, o9 Solutions, JDA/Blue Yonder

PANASONIC | Data Analyst - Forecasting & Reporting | Aug 2021 - Apr 2024

Barcelona, Spain

- Owned data extraction, validation and transformation workflows from SAP BW and POS systems supporting forecasting and commercial decision-making across Iberia.
- Automated recurring data processes using Python and VBA, reducing manual workload by ~40% and improving reporting reliability.
- Designed and maintained KPI dashboards in Power BI and Excel to track sell-in/sell-out performance and forecast accuracy, improving visibility and decision speed.
- Developed and optimized SQL queries for large-scale data extraction and ad-hoc analysis, enabling faster access to critical business insights.

Tech: SQL, Python, Power BI, Excel, VBA, SAP BW

SELECTED PROJECTS

Demand Planning Analytics Platform - Production-style dbt project transforming raw retail and planning data into tested, analytics-ready dimensional models for forecasting, inventory and commercial decisions.

Instant Booking A/B Test - Marketplace experiment evaluating booking conversion and supply-side health through experiment design, statistical testing and business interpretation.

Fintech Product Analytics - Product analytics dashboard analyzing growth, engagement and monetization for a fintech-style application using SQL Server and Power BI.

Customer Churn Prediction - End-to-end ML pipeline using Logistic Regression, Random Forest and XGBoost, with feature engineering, model evaluation and feature-importance analysis.

Stroke Risk Prediction - Decision-aware risk-scoring engine built with scikit-learn, including cost-sensitive threshold optimization.

EDUCATION

Bachelor of Medicine - Universidad del Salvador, Buenos Aires, Argentina | 2009 - 2019

CERTIFICATIONS

Google Advanced Data Analytics Specialization | IBM Data Science Professional Certificate | IBM Data Analyst | dbt Fundamentals (VS Code) | Data Analytics, SQL & Power BI - Coderhouse | Cambridge English: First Certificate
